

MFONISOABASI EPHRAIM EBONG

Software Engineer

(+234) 912-298-1131 | mfonisoischris@gmail.com | <https://github.com/mfonisoebong>

EDUCATION

Institution: Federal University of Technology Akure

Degree: Bachelor of Technology in Computer Science.

Relevant courses: Database Systems, Data structures & Algorithms, System Design & Analysis, Programming Languages, Operating Systems, Web development, Data analysis & Statistics, Machine Learning.

RELEVANT EXPERIENCE

Fullstack developer and QA Engineer, **Maaxdo Technologies** March 2023 – Present

- Developed and maintained E-commerce solutions including payment gateway integrations, inventory & product management, administrative management, user management, SEO (Search Engine Optimization) and customer feedback.
- Worked on automated QA testing scripts and software integrity validation.
- Developed and maintained Fintech infrastructures and solutions. I worked on system and database architectural design for fintech solutions as well as implementation of wallet systems, payouts, KYC features, administrative management, user management, API integration for external services and API security.
- Developed bots for automation and user management for seamless integration with existing services.
- Co-ordinated software development by managing designated teams and improving efficiency in delivering quality software projects.
- Worked on collaborative filtering, market basket analysis, and SEO performance forecasting.

Backend developer, **De-Future Elite Technologies (Contract)** August 2024 – Present

- Designed and developed a Utility billing API system, (Utifi) that allows developers to integrate utility APIs for purchasing airtime, purchasing TV subscription, paying electricity bills and trading gift cards.
- Developed APIs for a crypto trading mobile app that includes a wallet system, in-app notifications, user management, KYC (Know Your Customers), API security and external services integration.

Fullstack developer, **Ployco**

August 2022 – March 2023

- Developed and designed a music distribution system that enables artists to publish music and reach larger audiences. I carried out API development & integration, database design, API security implementation, frontend development of web apps for users and administrative dashboards.
- Provided customer support and user management services.

Software developer, **DWS (Intern)**

October 2021 – March 2023

- Learnt web fundamentals which includes: HTML, CSS, Javascript and Typescript
- Assisted in the development of websites and APIs

CERTIFICATIONS

- IT Essentials (through the Cisco Networking Academy program)
- CCNA: Computer Networks (through the Cisco Networking Academy program)

SKILLS AND PROGRAMMING LANGUAGES

Programming Languages:

HTML, CSS, Javascript, Python, Typescript and PHP.

Libraries, Tools & Frameworks:

React, Nextjs, GraphQL, Wordpress, Nodejs, Expressjs, Laravel, Django, Flask, FastAPI, Vuejs, PostgreSQL, MySQL, MongoDB and Tailwind CSS

Tools:

Git, Github, Docker, Figma, Jira & AWS

Personal skills:

Good communication, Team work & collaborative skills, Problem-solving skills and Time management skills
